

# Lets Crimp a Bracelet

## INGREDIENTS

- 1 toggle clasp
- 1 charm
- 1 4mm jump ring.
- 20 4mm spacers or size of your choice
- 60cm of wire suitable for crimping, eg tiger tail or accuflex
- 20 crimps
- 2g size 11 seed beads
- 10 feature beads of 10mm can be **bigger or smaller.**
- 5 x 6mm bi-cones
- 4 x 4mm Swarovski bi-cones
- 2 crimp covers
- 2 wire guards.

## Tools

- Crimping irons
- Wire cutters
- Flat nose pliers

## Let the fun begin!!!!

### Step 1

Using Tiger tail thread on the bar section of the toggle clasp.

If using a wire guard, place a jump ring around toggle clasp and close. Place wire guard on tiger tail and thread one crimp onto both strands and secure using crimping irons or flat nose pliers.

### Step 2

Thread onto one of the strands the following beads:

1 X feature bead, 1 4mm spacer bead, 1 4mm bi-cone, 1 feature bead, 1 4mm spacer bead, 1 4mm Bicone, 1 4mm spacer bead, repeat three times, thread until the end.( check your length on wrist, as it will change in length once seed beads are attached to other strand)

### Step 3

Don't crimp the other side but secure with a wire clip guard or tape to secure.

You need to be able to get your seed beads through your bi-cone.!

**Step 4** Onto the remaining strand , thread 6 size 11 seed beads, pass through bi-cone and repeat for the length of the bracelet;. Thread second strand onto a crimp, a wire guard, jump ring and back through the wire guard. Open jump ring and attached to the round toggle end on the other side.

### step 5

Crimp on to the toggle section, threading on a crimp and passing the tiger tail back through.

Repeat step one if using wire guard.

### Step 6

To complete attach the charm onto the round toggle part with a jump ring.

### Step 7

Take your crimp covers and secure over crimp by squeezing them into shape.

**ENJOY YOUR CREATION.**
